Who We Are

EDN'HKK SARL is a company specialized in e-government software development. We work with ministries, secretariats-general, public administrations and enterprises to digitalize their revenue, recovery and administrative management operations. Our approach: tailor-made, robust and scalable solutions, adapted to African realities.

E-Government

Software Development

Digital Transformation

E-Government: Our Core Business

We support governments and administrations in modernizing their digital services, from design to full system integration.

Public Administrations

Dedicated solutions for ministries, secretariats-general and government agencies.

1

Operations Digitalization

Automation and dematerialization of administrative processes and revenue collection.

Security & Compliance

Architectures compliant with national and international data security standards.

Public Revenue Management

A complete end-to-end solution

EDN'HKK SARL deployed an integrated platform for the collection, tracking and management of public revenues, notably for the City of Kinshasa, covering the full cycle: issuance, payment, reconciliation and reporting.

→ Revenue title issuance

→ Multi-channel collection (online, counter, mobile)

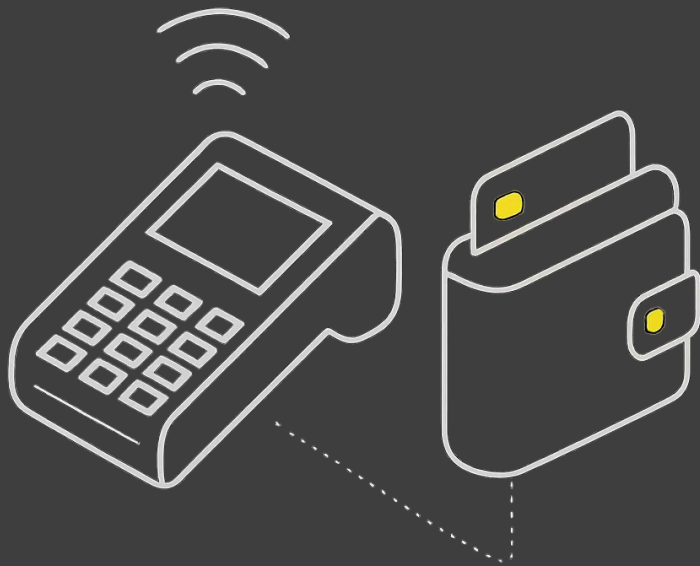

→ Automatic reconciliation and traceability

→ Real-time decision-making dashboards

INTEGRATED SOLUTION

Payment Circuit Integration

EDN'HKK SARL does not develop a proprietary payment module, but designs and integrates complete payment circuits allowing citizens and businesses to settle their administrative obligations through existing channels, with full security and traceability.

Multi-Channel

Integration of existing payment methods: mobile money, bank transfer, counter.

Security & Traceability

Transaction encryption and complete audit trail.

Automatic Receipts

Automatic generation and sending of payment receipts and vouchers.

Real-Time Monitoring

Payment flow monitoring and automatic alerts on anomalies.

Recovery & Receivables Management

The recovery of public receivables is a strategic challenge for administrations. EDN'HKK SARL deploys intelligent tools to optimize the tracking, follow-up and recovery of unpaid amounts, with a focus on traceability and operational efficiency.

Debtor Identification

Centralized receivables database with complete history and risk scoring.

Automated Follow-ups

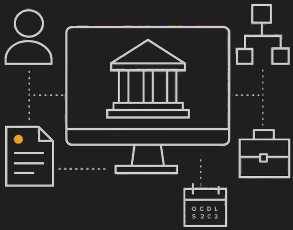

Configurable follow-up workflows by priority level and communication channel.

Recovery Dashboards

Recovery rates, deadlines and cash flow forecasts in real time.

Supporting the Secretariat-General

EDN'HKK SARL developed for the Secretariat-General of the Ministry of Communication a comprehensive application for human resources and audiovisual management: career management, payroll, accreditations and administrative operations.

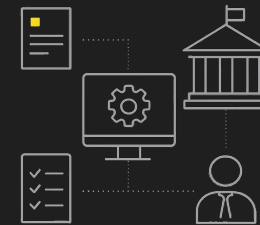

Human Resources Management

Career management, payroll, leave and staff accreditations.

Audiovisual Management

Tracking of licenses, accreditations and audiovisual sector operations.

Workflows & Validation

Validation circuits, electronic signatures and traceability of administrative decisions.

Multi-Sector Solutions: Public & Private

Beyond the public sector

Our expertise extends to both public and private enterprises. We notably developed for RTNC (Radio Télévision Nationale Congolaise) a taxation and air tax management application, with automated taxation forms, analytical dashboard, POS system and recovery management.

1 Public Enterprises (e.g. RTNC)

Automated taxation application, recovery dispute management, analytical dashboard and POS module for air tax.

2 Private Enterprises & Local Authorities

Electronic invoicing, payment collection management, banking interfaces and institutional reporting.

They Trust Us

EDN'HKK SARL has supported major institutions of the Democratic Republic of Congo in their digital transformation.

RTNC, Radio Télévision Nationale Congolaise

Taxation and air tax management application. Automated taxation forms, analytical dashboard, POS system and recovery dispute management.

City of Kinshasa

Municipal tax recovery platform. Revenue title issuance, multi-channel collection, automatic reconciliation and real-time decision-making dashboards.

Ministry of Communication

HR and audiovisual application for the Secretariat-General. Career management, payroll, accreditations and complete administrative operations.

Custom Software Development

Every administration has its specificities. EDN'HKK SARL designs personalized, scalable and maintainable applications, leveraging best practices in software development.
